

## THE EXPERT IN "PARTS MANAGEMENT SYSTEMS" Rotary Work Table

**R**otary Work Tables were designed to accept product flow from discharging belt or other general material handling systems. The rotary table or some times called spinning table is a robust design, which is engineered to take demanding punishment from an industrial environment. The rotary table is the key component in designing a flexible work cell for jobs requiring manual inspection, de-gating, assembly or packing. In typical applications, the product is conveyed on to a the table to allow multiple operators can efficiently handle tasks or allows multiple products (sub-assemblies) to be conveyed from multiple machines to one location and have one operator handle multiple tasks without added effort or ergonomic strain.

### Features:

- Industrial grade 11 gauge welded steel construction
- Adjustable height leg supports, nominal adjustment 30-36"
- Casters: Two way, toe locking, swivel casters with 4" diameter, polyurethane, non-marking wheels
- Premium grade STOBBER brand 56 C faced reducer with 368:1 gear reduction
- 1/3 HP DC, 56 C frame motor – off the shelf
- Adjustable speed drive with electric overload clutch, panel is recessed under the support frame.
- 4" tall perimeter rail to aid in part containment
- White polyurethane lined work surface
- Painted MAC metallic silver
- One year system warranty

**NOTE: Guarding provided per OSHA standards**

Model Number	Material	Table diameter	List Price 2002
ROT3	Steel	36"	\$ 3,350.00
ROT4	Steel	48"	\$ 3,665.00
ROT5	Steel	60"	\$ 3,980.00
ROT6	Steel	72"	\$ 4,295.00
